Rendell (Ren) Rich

Tampa, FL | rendellrich.github.io | linkedin.com/in/rendellrich | github.com/RendellRich

Professional Summary

Data Scientist with 8+ years of analytics experience transforming complex operational datasets into actionable insights that optimize operations and drive strategic decisions. Adept in Python, SQL, and Power BI, with proven success automating workflows, improving reporting accuracy by 35%, and leading cross-functional data initiatives that reduce costs and enhance efficiency. Completing a Master of Science in Data Science at Purdue University (Dec 2026). Experienced in operational data analysis, anomaly detection, forecasting, and process optimization, aligning analytics with business goals to deliver measurable improvements in productivity, safety, and customer satisfaction.

Core Competencies

- Data Analysis & Visualization: Power BI, Tableau, Excel (Power Query, PivotTables, Power Pivot)
- Database & Programming: SQL (SQL Server, MySQL, PostgreSQL), Oracle, Python (pandas, PowerShell, NumPy, matplotlib, BeautifulSoup), Azure Databricks, ETL/ELT Pipelines, Data Scraping, PySpark,
- Process Optimization: Workflow automation, SOP creation, KPI development, operational forecasting, call efficiency analysis
- Project Leadership: Cross-functional collaboration, Agile methods, process improvement, change management
- Business Tools: Asana, Confluence, Visio, Salesforce CRM, Cisco
- Soft Skills: Critical thinking, stakeholder communication, problem solving, leadership, adaptability

Professional Experience

ROC Operator – Plant Data & Trend Analysis – Pine Creek RNG, St. Petersburg, FL | March 2026 – Present

- Increased plant uptime 52% across 6 plants using data-driven trend analysis and anomaly detection on real-time process data.
- Researching co-digestion feedstock strategies to boost methane yield at an anaerobic digester.
- Develop and maintain SOPs for plant monitoring, standardizing operator response.
- Use monitoring and automation systems to track key metrics across all 6 sites and flag anomalies in real time.

Operations & Data Specialist – Waste Management, Tampa, FL | May 2023 – March 2026

- Leveraged Power BI and SQL to automate operational reporting and improve efficiency by 35%, driving actionable insights for leadership.
- Identified and filled data collection gaps, improving process visibility and saving 5+ hours per employee weekly through automation.
- Led cross-functional analysis to reassign 85,000 customers new containers, optimizing driver routes and reducing costs while enhancing employee safety.
- Developed and implemented standardized operating procedures (SOPs) that improved process accuracy, reduced manual errors by 25%, and ensured consistent operational performance across departments.
- Collaborated across sales, finance, and operations to unify data sources for strategic dashboards and executive-level reporting.
- Monitored operational performance metrics to identify safety and uptime risks in large-scale field operations.
- Experience supporting operational monitoring environments, safety-critical systems, and real-time decision making through data-driven insights
- Supported implementation of new technologies (e.g., time & attendance, procurement tracking), reducing administrative burden and enhancing reporting speed.

Real Estate Data Team Leader – True Integrity Team, San Antonio, TX | Jan 2018 – May 2023 (Concurrent)

- Directed market data analysis and developed Tableau dashboards and reports that supported over $150M in annual transactions.
- Applied analytics and data scraping techniques to optimize marketing campaigns, achieving a 48% improvement in lead conversion through CRM and audience targeting.

- Enhanced CRM data integrity and automated reporting pipelines by developing machine learning models to predict sales trends, integrating multi-source data, and driving a 40% increase in sales efficiency.

Freelance Web Developer – D & R Technologies, Dallas, TX | Jan 2018 – May 2023 (Concurrent)
- Developed and optimized responsive websites using HTML, CSS, JavaScript, and SEO analytics tools (Google Analytics, Search Console) to achieve first-page Google rankings and increase organic traffic by 40%.
- Built interactive data visualizations and client dashboards that transformed raw metrics into actionable insights, enabling data-informed decision-making and improving campaign performance tracking by 30%.

Security Operator – United States Army, Dallas, TX | Oct 2007 – Jan 2013
- Supervised and trained personnel in mission readiness and logistics, maintaining accountability for over $150M in assets while driving operational efficiency and team performance under high-pressure conditions.
- Executed complex tactical operations requiring rapid decision-making, strategic planning, and strict adherence to safety protocols.
- Developed leadership, communication, and problem-solving skills through structured training and real-world mission execution.

Education

Master of Science in Data Science - ***Purdue University*** (Expected Dec 2026)
Coursework: Machine Learning, Data Mining, Cloud Computing, Statistical Modeling

Bachelor of Science in Business, Data Analytics - *Liberty University* (May 2025)
Minor: Information Systems | Coursework: Predictive Analytics, Database Management

Associate of Applied Science in Network Systems Administration - ITT Technical Institute (Dec 2015)

Certifications

- Google Data Analytics Professional Certificate
- Microsoft Power BI Data Analyst Associate
- Tableau Desktop Specialist
- SQL for Data Analysts
- Lean Six Sigma Yellow Belt

Key Projects

PartyCohesion | 2025 | partycohesion.streamlit.app
Built and deployed a politically neutral web app that analyzes every House and Senate roll call vote since 2007 to measure party-line cohesion and whether voting patterns shift with the White House. Python, pandas, Plotly, and Streamlit, with an automated twice-weekly data refresh and 109 automated tests.

Operational Efficiency Dashboard | 2024
Automated Power BI dashboards using SQL- and Databricks-based ETL pipelines, reducing manual reporting time by 50% and enhancing decision-making speed.

Homeschooling Population Trends | 2023
Analyzed national datasets using SQL and Power BI to uncover growth patterns in homeschooling demographics across states.

Cost per Household Analysis | 2023
Utilized SQL JOINs and Tableau to visualize state-level cost-of-living disparities, highlighting key drivers influencing household economics.

Awards & Recognition

- National Technical Honor Society
- Army Achievement Medal
- Army Commendation Medal (2x)
- Iraq Campaign Medal & Overseas Service Ribbon
